

Drive-on platform for jet skis with a set of connectors for high board modular docks

SKU: PONNAJWB_KPL

Gross Price: €4,112.64

Net Price: €3,456.00

Technical Specification

Attribute	Value
Displacement	770 kg
Dimension	400 cm x 148,5 cm x 32,5 cm
Color	Grey
Material	Polyethylene
Weight	165 kg
Usable area	5,92 qm
Shipping time	7-14 days
Production time of 100 pcs	20 days

Description

Drive-on platform for jet skis with a set of connectors for high board modular docks

Looking for a professional dry-docking solution to keep your personal watercraft (PWC) safe and dry? The offered ****Drive-on platform for jet skis with a set of connectors for high board modular docks**** is a state-of-the-art drive-on platform (dry dock) designed to let you drive your jet ski completely out of the water effortlessly. By elevating the jet ski, the fiberglass hull is 100% protected against marine growth, osmosis, and wave-induced mechanical damage. The high-strength HDPE frame is fully frostproof and UV-resistant, allowing the dock to remain frozen in the ice without disassembly. Integrated polyurethane rollers align perfectly with your hull, minimizing friction and protecting the gelcoat.

The Sorfan jet ski port represents peak ergonomics and simplicity. Its stable, buoyant design makes boarding, refueling, routine cleaning, or putting on the protective cover safe and convenient. Ball-bearing polyurethane rollers ensure smooth drive-on docking and effortless launch recovery. The port can be dynamically coupled to low board docks, highboard docks (WB), or concrete quays using specialized connection kits.

Technical Specification

Drive-on platform dimensions	142 x 200 x 30 cm (złącza WB)
Freeboard height	30 cm
Dry weight	42 kg
Max. buoyancy capacity	450 kg
Material	High-density polyethylene (HDPE) with UV protection
Color	Light grey / White

Key Technical Features and Benefits:

- **Optimal Slip-Resistance:** Textured non-skid surface pattern ensures secure footing under wet conditions.
- **Year-Round Durability:** Mrozoodpornost and ice-overwintering proof allow the dock to safely freeze in the water.
- **EU-grade HDPE Quality:** Produced in the EU from certified, high-density polyethylene for maximum durability.
- **Flexible Modular Design:** Symmetrical mounting allows quick connection into L, T, or U-shaped piers.
- **Zero Upkeep Costs:** Requires no painting, chemical impregnation, or algae scrubbing like wood

or steel.

Available accessories for modular floating docks

To fully customize your ready-made floating docks to your requirements, we offer a comprehensive range of premium accessories:

- [**Cleat / Knagge**](#) – Essential for secure mooring of boats and PWCs.
- [**Safety barrier Series W \(1.12 m\)**](#) – Significantly enhances user safety.
- [**Post connector WS 5.4 kg \(Series highboard\)**](#) – Heavy-duty connection for anchoring piles.
- [**Float connector WL 2.3 kg \(Series highboard\)**](#) – Symmetrical coupling of float modules.
- [**Aluminium dock ladder**](#) – Safe and easy access from the water.
